the SiloFloat® - Anti-Algae solution for silos

Genap introduces the new floating cover, the SiloFloat® for water silos.

With the SiloFloat Genap fulfils the market requirements for a reliable anti-algae solution for water silos. Due to the high UV resistant material this solution is very suitable for the export market. The SiloFloat covers the water surface for almost 100% and can be applied both in an empty and a filled silo. The SiloFloat can be installed by two persons very simple and quick and requires no tools or electricity during the installation. The SiloFloat anti-algae cover is supplied as a complete system, ie including all parts needed.

Benefits:

- Completely furnished.
- Very easy to install without special tooling.
- Quick installation in both empty and full water silos.
- Suitable for all types of water storage in horticulture.
- No algae growth.
- Low maintenance.
- Very high buoyancy.
- High UV-resistance.
- Reduced evaporation.
- Technical manual is included with each delivery

Available starting November 1, 2009.
